

uniFLOW ONLINE EXPRESS

**SAVE COSTS.
SECURE YOUR PRINTS.**

uniFLOW Online Express helps your organisation track multifunction device usage, control access, and make scanning simple, all in a cost-effective way. With its cloud-based architecture, maintaining costly print servers becomes a thing of the past.

CLOUD-BASED INFRASTRUCTURE

Management of the system is simple through its intelligent cloud control centre. Print jobs stay within the office network, and any configuration and log data between the cloud and the MFD is encrypted and secure.

PRODUCTIVITY MADE SIMPLE

ENHANCED DEVICE SECURITY

Unauthorised device usage can cause important documents to end up in the wrong hands. uniFLOW Online Express can help to prevent this by controlling access to the device, via user PIN code and/or personal access card. The secure access setup is done once and simple, freeing up time for more important tasks.

USAGE TRACKING AND REPORT

uniFLOW Online Express makes it effortless to track usage and costs with an intuitive dashboard supported by personalised widgets. The simple graphical reports help the administrator gain greater insights into usage trends and facilitates informed decision making for cost reduction measures.

SIMPLE SCANNING

Users can perform quick scan jobs to their email address or Google Drive™, right from the device. The scan workflow follows the user, whichever Canon imageRUNNER Advance device they use for greater productivity.
