SAY HELLO TO PICK!

Often, the best memories are created when we least expect it.

The **Canon PowerShot PICK** is your smart personal photographer that's automated to do everything for you!

Equipped with face recognition, automatic composition and automatic shooting, the PowerShot PICK gets all the job done so you can sit back and enjoy hands-free photography. You don't need to be a camera expert to get great shots.

Indoors or outdoors, this small and portable device is perfect for capturing those natural, unexpected moments of you and your loved ones anytime, anywhere!

With voice-activated controls, you can capture your unique journey every day by simply saying '**Hello PICK**' to start.

It's that easy!

MENU

A Camera That Recognises You

Automatic Shooting

The PowerShot PICK takes into consideration your smiles and composition variations, extracting the good scenes as it automatically captures you, your family and friends in action!

The result? A super easy and seamless user experience that’s hands-free and fuss-free. With PowerShot PICK, you can get good photos and videos even without expert camera knowledge!

Face Recognition & Subject Tracking

The PowerShot PICK automatically searches, detects and recognises the faces of people around it while Nano USM technology allows for quiet, high-speed tracking of subjects as they move.

You can even customise shooting preferences, register detected faces and select their shooting priority for the camera, all on the *Connect app for MiniPTZ Cam!*

Let It Work Its Magic

Automatic Composition Adjustment

Using Canon’s unique algorithm, the PowerShot PICK can automatically search for people nearby. Together with built-in 3x optical zoom, it also adjusts image composition on its own using pan, tilt and zoom mechanisms based on the number of faces detected, as well as the position, orientation and size of the subjects!

All Clear, Always Stable

The camera’s built-in image stabilisation system helps to suppress significant shaking—giving you stable and clearer photos and video footage!

Compact & Lightweight

Weighing only about 170g*, this lightweight device fits nicely on your palm and can easily be used handheld or mounted on a tripod. It uses a microSD card for memory storage and can be easily recharged using USB-C cables. Whether it’s outdoors, on your tabletop or in your bag—it fits almost anywhere!

*including battery, based on CIPA standards

Hello PICK, Snap A Picture!

Your hands are full, but this moment could be priceless, and that’s where we come in super handy.

Voice-Activated Controls

With specific voice commands*, you can instruct your PowerShot PICK to snap a photo or record a video for you. You don’t have to lift a finger!

Hello PICK,
Snap a picture!

Automatically shoots
a series of still photos.

Hello PICK,
Record a video!

Starts recording a short video.
Say “Hello PICK” to
stop recording.

Hello PICK,
Find others!

Automatically searches for
other subjects in the area.

Hello PICK,
Auto off!

Stops automatic shooting.
Say “Hello PICK” to resume
automatic shooting.

* Supported languages: English, Chinese, Japanese, French, German, Italian and Spanish

Clever, Easy To Use

Smart Connectivity & Controls

Easily connect your PowerShot PICK to your smartphone or tablet with Bluetooth or Wi-Fi via the dedicated *Connect app for MiniPTZ Cam*. There, you can use the app to perform remote shooting and manually control the camera to snap photos or record videos. You can also view photos and videos, or even generate unique highlight videos^ too!

^ Applicable for iOS only.

Go Live

Connect PowerShot PICK to your PC wirelessly and let it be your webcam and go live using the dedicated software *Wireless Webcam Utility for Mini PTZ Cam*[∞]. Camera orientation can be easily controlled within the software.

[∞] Currently available on Windows only as of Oct 2021. Camera firmware version 1.1.0 or later is required.

Easy Steps To Turn On The Fun

1. Turn on the power and start automatic shooting.
(Pairing with a smartphone is required when turning on device for the first time.)
2. Place camera in position.
3. Check images and videos via the smartphone app.
4. Save content to smartphone's camera roll as needed.
